Tafonco a.s. - Company profile

Foundry production in Kopřivnice began in 1860. Since the very beginning, it has been linked with production of vehicles – carriages, buggies, railroad cars, and finally, cars and trucks. Today's Tafonco a.s. is a subsidiary company of TATRA, a.s., a traditional producer of trucks.

At present, we sell castings made of grey cast iron, ductile cast iron, steel, and aluminium alloys to companies from automotive, construction and engineering industry. We also supply castings for agricultural technology, tractors and forklift trucks. We have our own pattern shop where we

Napsali o nás

Helping you build a better machine, faster.

Danaher

Společnost Danaher (www.danaher.com) je nadnárodní společností s pobočkami po celém světě. V ČR patří pod Danaher krom brněnského závodu Danaher Motion také např. Hach Lange v Praze, v SR je to Hengstler v Kežmarku.

Aktivita skupiny Danaher:

- **Electronic Test** - jedná se o celou řadu kompaktních profesionálních testovacích nástrojů a kalibrovacího zařízení, tyto testovací výrobky měří napětí, odpor, sílu, frekvenci, teplotu, tlak a další parametry.
- **Motion** - jedná se o motory, řízení, kontrolní mechanismy, mechanické komponenty (např. lineární ložiska, brzdy) a příbuzné výrobky, které jsou určeny např. pro výrobu balicích zařízení, lékařských nástrojů, zařízení obvodových desek a elektrických vozidel (např. elektrických zvedacích vozíků).

HYDROENERGI

[Home](#) [Contact](#)

TURBINES, EQUIPMENT & SYSTEMS FOR SMALL HYDROELECTRIC POWER PLANTS

HYDROENERGI is a private Norwegian company specialised in engineering, procurement, production and delivery of Norwegian turbines and systems for small/medium hydroelectric power plants in the range 1 – 30 MW.

Technology

Hydroenergi's main product is design and construction of Francis, Pelton and Kaplan turbines with high efficiencies. The company focuses on technical quality. In general, no turbine specifications and projects are executed without reference to model tests or prototypes.

Tailor-made Solutions

Hydroenergi provides tailor-made solutions ensuring the highest efficiencies and best overall results for its clients. The company's deliveries range from individual turbine components to full turnkey electromechanical power plant outfitting, with electrical and control systems, and including installation and start-up services.

- turbines
- hydraulic control systems
- valves and piping systems
- generators and transformers
- electrical and automation systems
- penstock and intake structures
- installation and commissioning
- upgrading and refurbishment
- operation and maintenance

Experience Counts

Hydroenergi has designed, produced, installed and commissioned numerous modern, compact Kaplan, Francis, Pelton and Propeller generating sets. The total output is more than 180,000 kW from 100 turbines. For several years the company gained and adopted experience from operating its own power stations.

ULTRA ENGINEERS

The screenshot shows the top section of the Ultra Engineers website. On the left is the company logo, a stylized 'UE' in blue. To its right, the text 'ULTRA ENGINEERS' is displayed in large blue letters, with 'HEAVY ENGINEERING PROJECT MANUFACTURERS' in smaller orange letters below it. In the top right corner, there are navigation links: 'Home | Careers | Contact Us'. Below these links is the AQR logo with 'ISO 9001 : 2000' underneath. A vertical blue navigation menu on the right side contains the following items: 'ABOUT US', 'PRODUCT RANGE', 'FACILITIES', 'QUALITY', 'CLIENT LIST', 'NEWS', and 'DOWNLOAD'. The background of the header features a collage of industrial images, including a large metal part being machined, gears, and a wind turbine.

WIND MILL COMPONENTS, HEAVY DIE AND MOULD ASSEMBLIES
WIND MILL COMPONENTS, HEAVY DIE AND MOULD ASSEMBLIES

FOR ALL YOUR PRECISION MACHINING TO FABRICATION NEEDS

We believe in attaining core competence in the Heavy Metal sector by incorporating AVANT GRADE TECHNOLOGY (Advanced design, manufacturing, and assembly of critical components) in the production, to live up to the discerning global demands. Our endurance and flexible approach have enabled us to develop standard and custom configured components, each devised to perfection.
